Hong Kong, HK

EXPERIENCE

FullStack Mobile Engineer

StartupLandia

03/2020 California, UnitedState

- At my current position, I am working on Flutter/Dart mobile app developer with part-time for Sports Events Tracking/Betting App development.

Software Engineer

Digia Technology

10/2018 - 11/2019 Toronto, Canada

- At this position, I worked on 3D and 2D data visualization Web apps and AI-based mobile app development for Marketing Analytics, Ecommerce. I use technologies such as: Javascript, Typescript, Three.JS, D3, React/React Native and NodeJS, Python.
- In addition to full stack development, I also worked on a lot of dev-ops tasks. I have helped set up a lot of our unit, ui and build/deploy plans. Also other process improvement tasks like JIRA transition workflows, slack notification services and BitBucket/JiRA/GITHub API services. I utilize ansible for our automation, bamboo for our build/deployment, bitbucket for our git repositories and confluence/github pages for our documentation.

Web Application Developer

Sitback solutions

01/2017 - 08/2018 Australia

- At this position, I was responsible for developing, implementing and maintaining mostly web applications. I collaborated with technical and business staff in the design, development, testing, implementation and production support of enterprise applications.
- I primarily used MERN Stack. 60% of my work was doing front-end development, 20% was backend development and the remaining 20% was dev-ops/sys admin related tasks. I had a few sys admins for a 300 person + company. They were very swamped so I was occasionally asked to do things such as migrating test database data between environments, doing jenkins builds/minior build plan teaks, configuring webpack/or ui/unit, integration testing frameworks.

FullStack Engineer

FleckActives

07/2015 - 01/2017 Australia

- At this position, I worked in some of web apps included: Digital menuboard, Ecommerce platform, mobile/desktop business dashboards, online website plugins and APIs. I was responsible for the managing my team's web infrastructure, seo, marketing and website design.
- most of the servers I dealt with were Debian/Ubuntu and I utilized DigitalOcean for off-site hosting.

OBJECTIVE

Hello! I am Zhang Wei and I am a software engineer working on web applications and web infrastructure & mobile applications and mobile infrastructure. I have been developing professionally for 8 years but tinkering since a kid. I started in tech with internships, freelance services and part time positions during college.

I have a bit off a diverse job history. I have had positions in help desk, graphic/web & mobile design, web & mobile app development and sysadmin/devops. I can help every where in the stack and I love wearing multiple hats to an extent. Although, I do think my most strongest skills are in software engineering and mobile app development.

Most of my positions utilized agile-like development processes using JIRA/TFS. I am also a certified scrum master with ScrumAlliance.

A day in my life may consist of: prepping web & mobile art, fixing some front-end bugs, adding an API endpoint, dockerizing an application, database design, configuring a unit or ui test library, setting up a build or deployment plan, provisioning a test tier machine of feature work when I am lucky.

SKILLS

Web

Javascript	Typescript	ES6	D3
React	Vue	Angular	Redux
NextJS	Gatsby	Jest/Enzyme	
Webpack/Gulp/Babel	Material UI		

EXPERIENCE

Web Application Engineer

Baize Technology Pte Ltd

01/2014 - 04/2015 Singapore

- At my first full stack position, I was doing front-end development with HTML5, CSS, Javascript, AngularJS and back-end development with PHP. I utilized MySQL and PostGres.
- In addition to development, I also helped with end-user support for stakeholders and designated end users when escalated above our support teams.
- For the last half of this position, I led a team of 3 developers for our company's largest web app contract: a fitness video and recipe center website development.

A DAY OF MY DEVELOPING LIFE

- A** Having meeting and discussing, reporting working results with my client's and team.
- B** Spending time with developing web and mobile art, fixing some front-end UI, configuring a unit or ui test library.
- C** Spending time with integrating backend API endpoints, 3rd party services, deployment.
- D** Spending time with research new technology

STRENGTHS

Hard-working(18/24), Lead Web&Mobile application development, User-friendly/interactive, pixel-perfection/responsive UI.

SKILLS

AndD/Fuse Theme/CoreUI GraphQL

Apollo SCSS/SASS/CSS3/LESS

NodeJS/ExpressJS/NestJS Python

Django/Flask Ruby on Rails C#

Mobile

React Native Flutter Dart

Kotlin Swift Objective C Java

EDUCATION

B.C in Computer Science

University of Waterloo

2012 - 2013

M.S. in Computer Science

Shanghai University of Engineering Science

2008 - 2012
